Event Management

What is the Event Management Module?

The Event Management Module allows you to create unique events and invite individual or bulk applicants to those events.

How is it used in practice?

Recruiters can create multiple types of events using the solution:

- Open Days
- Bulk Interview Events
- Careers Drop in Sessions
- Induction Events

What are the benefits of using it?

Managing the diaries of hiring managers, recruiters, and candidates is a huge challenge. Using the event manager, you no longer need to manually check individual availability and invite people to events. Creating an online event that candidates and others can accept or decline an invitation to saves hours on administration and means invites, and confirmations are completed in the shortest time possible.

What are the extras?

Using the solutions standard features to manage events will significantly improve recruiter's efficiency. Additional elements can include:

- Online Feedback forms
- Outlook Integration
- Confirmation of attendance to an open day, additional ability to book a one to one informal chat time slot
